Op-mon to use one IP and daemon within a cluster

1) make sure, slave nodes -> master node can connect over port 2080

2) on master node, add to /etc/xroad/conf.d/local.ini

```
[op-monitor]
host = <master-internal-IP>
```

3) on master node
`service xroad-proxy restart`
4) on slave nodes
`service xroad-proxy restart`
`service xroad-opmon stop`
`service xroad-opmon mask`
